**STATEMENT OF HANY'S PRESIDENT DANIEL SISTO ON THE SIGNING OF
MANAGED CARE REFORM LEGISLATION**

ALBANY, N.Y. – “Reform of the managed care industry is a critical step in restoring a market balance between health care providers and managed care plans and, more importantly, to ensuring consumers have access to quality health care. This legislation represents significant progress in these reform efforts. It will help bring more accountability to managed care organizations and greater protections for consumers and providers.”

“HANY recognizes the critical role that the State Insurance Department, Department of Health, and key legislators played in leading these discussions and forging a consensus among the major stakeholders in health care. We look forward to an era of progressive engagement and future collaboration with the Governor, the agencies, the plans, and the Legislature as we continue to work toward managed care reform.”
