Revenue Intelligence™

Acceleration Suite

Fast-track payer and patient cash with proprietary technology backed by unmatched experience in aged, complex, and clinically challenged claims and denials.

AR Recovery

Accelerate cash collection with full-service accounts receivable liquidation and management for hospital inpatient and outpatient accounts receivable inventory.

Denials Recovery

Recover denials faster and minimize future denials with full-service denial and appeals management that quickly and efficiently resolves wrongfully denied or underpaid claims across all payers.

Complex Claims Referrals

Maximize reimbursement for complex claims like motor vehicle accident (MVA), workers compensation (WC), and VA with our expert team that provides end-to-end recovery services.

Entri™Pay

Transform the consumer billing experience with market-leading patient payment technology combined with compassionate customer service proven to drive measurable results and patient satisfaction.

Physician Advisory Solutions

Navigate the complex payer and regulatory environment and mitigate denials with clinical experts supporting utilization review, level of care and peer-to-peer review.

Optimization Suite

Capture missed or underpaid revenue for the care provided with our comprehensive payment review that catches what others miss.

Charge Capture

Find more missing reimbursement with proprietary matching technology that links hospital and physician billing to find inconsistencies in coding, charging, and billing other solutions can't see.

DRG Validation

Maximize reimbursement, quality, and compliance with a comprehensive financial and clinical data review to find misaligned DRG assignments and New Technology Add-On Payment (NTAP) opportunities.

Transfer DRG

Identify and recover lost revenue due to transfer DRG underpayments with the industry's most comprehensive and compliant technology-enabled services using CMS data to drive more recoveries.

Underpayment Recovery

Improve revenue collection by identifying and recovering underpaid revenue through deep expertise in payer reimbursement methods, contract analysis, clinical coding, and billing.

Government Navigation Suite

Optimize government reimbursement accuracy, maximize pharmacy savings, and ensure compliance with our elite team of industry specialists.

340B Recovery

Increase 340B savings by finding missing prescriptions written by eligible and referred-to providers with our compliance-first, technology-enabled solution.

Medicare Bad Debt

Improve reimbursement and compliance with expert identification and management of claim-level Medicare deductible and coinsurance write-off amounts for reimbursement on the Medicare Cost Report (MCR).

Worksheet S-10

Recover all uncompensated care revenue with highly specialized auditors and analysis of large volumes of data that quickly and accurately uncover all the revenue that's rightfully yours.

Disproportionate Share Hospital

Optimize Medicaid eligible days with a full-service solution that utilizes highly skilled auditors and analysis of large volumes of data to capture more reimbursement with assured compliance.

SSI Redetermination

Identify and recover underreported Supplemental Security Income (SSI) percentages with a full-service solution and industry-recognized expertise that precisely and accurately identifies redetermination opportunities.

Automation Suite

Simplify complex, labor-intensive workflows with automations configured, managed, and optimized by our revenue cycle experts.

Configuration-ready automations drive accelerated value:

Prior Authorization

Reduce manual effort and speed time to care delivery by requesting and reconciling authorizations

Notification of Admission

Prevent denials by payer notification and clinical submission

Enhanced Claim Submission

Improve first-pass clean claims rate with claim attachments and billing error resolution

Enhanced Claim Status

Efficiently follow-up and accelerate reimbursement with claim status

Automated AR Follow-Up

Shorten AR days and collect full payment with denial resolution and low-balance AR rebill
