

Increase Revenue with Digital-First Patient Account Resolution

Health systems face ongoing financial pressures from rising costs, labor shortages, and growing bad debt. R1 Entri™ Pay helps improve financial performance by combining digital-first patient financial engagement technology with compassionate, personalized service for consistent, timely account resolution. Only Entri Pay combines the technology and services it takes to simplify your vendor footprint, reduce operating costs, increase net-new cash, and drive higher patient satisfaction.

Aligned incentives drive exceptional outcomes

An uncertain economic climate and increasing out-of-pocket responsibility make facilitating patient payments more important than ever. Many organizations rely on their electronic health record (EHR) portal plus an in-house team or an early-out provider to resolve accounts. But that approach is expensive, labor-intensive, and leads to disjointed experiences and sub-par revenue capture.

Bringing technology and people together for a better patient experience

Entri Pay provides an intuitive, digital-first experience along with highly personalized assistance to improve patient satisfaction. We provide the expertise, technology, and services to help clients simplify their vendor footprint, reduce operating costs, and increase net-new cash, while transforming the billing experience into a driver of patient satisfaction and loyalty.
