

# Helping Healthcare Providers Optimize Reimbursement and Prevent Denials for Concurrent Reviews

Hospitals and physician groups are flooded with rules and regulations, with multiple federal, state, and commercial entities auditing compliance. These factors require precise and timely case classification, as well as formalized admissions and billing processes. Now, as margins shrink and the reimbursement climate grows more challenging, even a small percentage of denials can significantly impact financial performance.

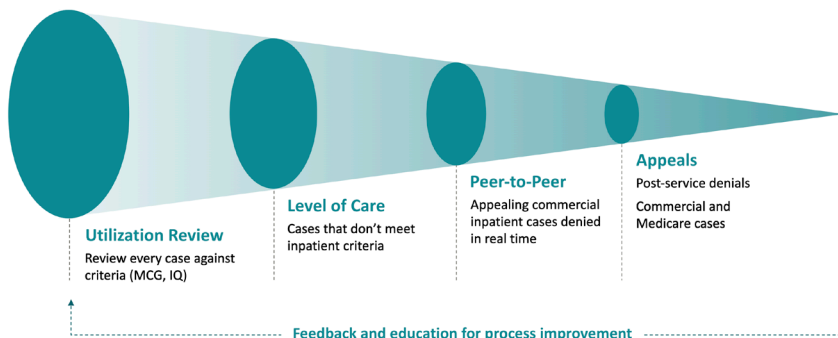

**Physician Advisory Solutions (PAS)** helps healthcare providers navigate the regulatory environment by focusing on concurrent recommendations to increase billing compliance as well as success on retrospective appeals. With a team of more than 100 clinical experts, from nurses to physician advisors, we can be an extension of your clinical team.
