Social risk scores

Social risk is defined as the population's risk level across SDoH domains. Risk scores range from 1 (low risk) to 5 (high risk).

New York City risk score: 3.7

% of NYC at high risk:

- Food insecurity: 47%
- Health literacy: 65%
- Housing instability: 80%

Bronx risk score: 4.3

% of Bronx at high risk:

- Food insecurity: 60%
- Health literacy: 95%
- Housing instability: 94%

Queens risk score: 3.8

% of Queens at high risk:

- Food insecurity: 39%
- Health literacy: 74%
- Housing instability: 74%

Health Characteristics

Bronx:

- The Bronx was reported as the city’s “Hungriest Borough”
- One in four Bronx residents faces food insecurity, which is 1.7 times greater than the state average
- About 30% of the Bronx's population suffers from obesity, and 16% from diabetes

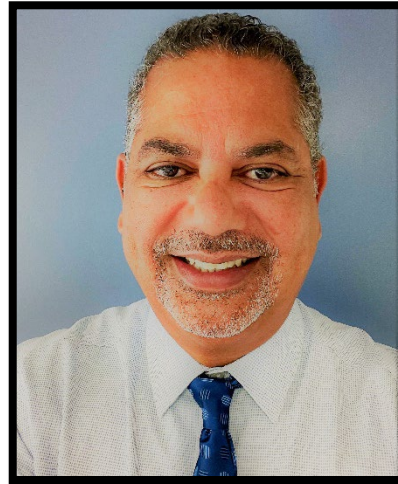

Queens:

- Queens is known as “The World’s Borough”
- Nearly half of Queens residents are immigrants- with more than 1 million immigrants
