New York's Hospitals and Health Systems Improve the Economy and Community

## Economic and Community Benefits

### Economic activity

**\$10,112,000,000**

The economic activity generated by hospitals through jobs and the purchase of goods and services makes up 10.4% of the state's entire gross domestic product.<sup>[1]</sup>

### Jobs supported

**44,000**

Hospitals and health systems are often the largest employers in communities, generate many more jobs and are top 10 private sector employers in every region of New York.<sup>[2]</sup>

### Tax dollars generated

**\$978,000,000**

New York hospitals generate significant tax dollars and stimulate the economies of local communities and the whole state.<sup>[3]</sup>

### Payroll expenditures

**\$2,421,000,000**

New York hospitals' #1 investment is in their people, including direct salary and benefits to their employees.<sup>[4]</sup>

### Community benefits and investments

**\$1,061,000,000**

Adhering to their charitable mission, hospitals cover the cost of care provided to people in need; subsidize care and services to low-income, elderly and under-served communities; and continuously invest in many community health initiatives.<sup>[5]</sup>

## Patients cared for

### Outpatients provided care

**2,400,000**

### People treated in the emergency room

**323,000**

### People admitted to hospitals

**89,000**

### Babies delivered

**6,500**

Hospitals serve patients in their communities 24/7, 365 days a year.<sup>[4]</sup>

### Patients covered by Medicare and Medicaid

In this district, Medicare and Medicaid patients make up:

- **70%** of all people admitted to hospitals
- **62%** of all outpatients provided care

**56%** of hospital patient service revenue in this district comes from Medicare and Medicaid. This is a result of the large volume of services being reimbursed by Medicare and Medicaid, which do not cover the cost of care, driving significant underpayment from these public insurance programs.<sup>[4]</sup>

# District Hospitals
