

# Project Firstline

## Infection control and prevention program

Project Firstline provides free education to frontline staff, providing practical ways to protect themselves, their facility, family and community from infectious diseases, such as COVID-19.

Expert faculty from the University of Rochester Medical Center will provide Project Firstline's innovative content through live and on-demand sessions, answering your most pressing questions live during the presentations.

### Webinar topics

October 2021 - April 2022

CDC's Project Firstline is infection control and prevention training specifically tailored for the healthcare workforce. **Register for upcoming live training and on-demand sessions:**

- SESSION 1 The concept of infection control training
- SESSION 2 The basic science of viruses
- SESSION 3 How respiratory droplets spread COVID-19
- SESSION 4 How viruses spread from surfaces to people
- SESSION 5 How COVID-19 spreads: A review
- SESSION 6 Environmental cleaning and disinfection
- SESSION 7 Source control in healthcare to prevent infection
